

Solvent-free Pool-fix™ Range Underwater Pool Repair Systems Pool-fix & Pool-fix Filler/Grout

This product range has been designed to be applied directly underwater with the minimum of surface preparation; it is ideal for repairing cracks, small leaks and grout repairs in swimming pools without the need to empty the pool.

Pool-fix™ benefits:

- Little or no product dispersion during application
- Forms a very smooth paint-like finish - can be coloured to match
- It is very easy to apply requiring very little surface preparation - no special training or equipment required
- Its smooth finish is not a scratch hazard to swimmers
- Huge cost reduction as the product cures underwater so the pool does not have to be emptied
- Can withstand the physical stresses caused by wave action
- Superb adhesion - "pull-off" tests when applied to wet substrates surpass 1350psi before cohesive failure
- Can adhere to most swimming pool surfaces including tile, concrete, paints, etc.
- It contains no solvent or styrene making the products user and eco-friendly
- Versions available for both crack and grouting repair
